\*Biology (requires lab) \*Chemistry (requires lab)

\*Geography/Health \*Geometry \*U.S. History \*World History

## Upland Update

Praise be to our Lord for His continued blessings! We  
are preparing to close on the Upland property. I  
know this has been a long process this year, with the  
banking industry and various complications, but we  
are in the final stages of the bond financing/closing  
and all systems are go! Appraisals are being con-  
ducted and environmental surveys have already been  
completed. In addition to these items above, we will  
be going through a couple of very general formalities  
with bond financing including TEFRA and CECFA  
bond hearings. These are general formalities since  
our loan/bond was generally approved months ago,  
at the Colorado office where our non-profit religious  
bond is being funded.

Proceeds from the bond will help fund the Upland  
school facility and refinance the existing debt for our  
facilities on the Claremont campus, including our new  
middle school facilities. This year in our middle  
school we opened 5 new technologically advanced  
classrooms complete with computerized Smart  
Boards, a library with computers, a computer lab, and  
a music room for choir and instrumental instruction.
